Eurogames is a family owned business with over 40 years of experience in the design and manufacturing of minicars, battery cars, bumper cars, bumper boats, battery-op rides, amusement rides and kids attractions. Started in 1969 by Domenico De Carlo with the production – revolutionary for its time – of battery cars for children, Eurogames has achieved international leadership in the industry of amusement rides thanks to its high-quality manufacturing standards, accurate planning, motivated and qualified team of designers, mechanical and electronic engineers, sales experts and a solid network of international dealers.

Fabio De Carlo, son of the founder and current managing director, has expanded the company’s outreach and vision by adding new and attractive products with unique features which have made Eurogames well known all over the world.

Eurogames designs, manufactures and distributes over 1500 units of 100 different products in 8 categories: Mini Battery Cars & Bikes, Go-karts for adults, Big Cars, Bumper Boats, Bumper Cars, Baby Animals, Tracks & Pools, Decoration & Settings. Eurogames has been the first European brand to manufacture battery cars and bumper cars. Our products and all their components are 100% made in Italy in our 54,000-square-foot plant and are available worldwide.

Thanks to our specific expertise and resources, at Eurogames we don’t stop at manufacturing and selling amusement rides, but we consult our customers along every step of the installation process. From the drafting of your project to the installation itself, from the training of your staff to the promotion of your location, Eurogames provides extraordinary post-sale assistance and a customer service that is unparalleled in the industry.

MINI CAR/BIKE

Bring more fun to the race with the best track ride for the younger

Manufactured for the first time in 1969, Eurogames Mini Car is today the sum and result of a long tradition in quality, research and innovative thinking. A perfect attraction for children 3 to 12 years old, Eurogames Mini Cars and Mini Bikes are designed to run on concrete, asphalt or any smooth surface track. Their motor-wheel-engine offers superior durability and minimal maintenance together with enhanced safety; with their remarkable battery life they can be powered up for up to 8 hours. Some Mini Car models and all our Mini Bikes are equipped with two seats to comfortably accommodate an accompanying adult or two young riders together.

Our Mini Cars and Mini Bikes can run outdoor or indoor and are the first in the world to feature a proprietary turbo boost function that randomly speeds up the machines to increase the fun of the race.

Eurogames Mini Cars and Mini Bikes are manufactured according to the highest safety and quality standards. They are available in over 20 different models to suit any environment and their body can be custom designed and custom painted to any specifications.

DRIVING SCHOOL
The thrill of driving like grown-ups!

The Eurogames Driving School System is an educational attraction consisting of specially modified cars running on a custom designed track. Young drivers can experience the thrill of driving while actually learning.

Children 3 years and older learn basic driving skills and road sign meanings and they can even earn their own “driver’s license” in a playful setting that gives them real-life teachings while having a lot of fun.

Our standard Driving School System uses two special battery operated Mini Car models - cabrio and city car - which feature several functions working just like in real cars: two seat belts, horn, head and tail lights, turning lights, accelerator and brake pedals, complete dashboard and reverse gear. Upon request, these features can be installed in our Big Car and other Mini Car models to add to the variety of vehicles on your track and make the Driving School experience even more life-like.

Eurogames can design and manufacture all components of the Driving School System. Custom-designed vehicles - like police cars and fire engines - can also be manufactured upon request. Architectural accents like bridges and park benches, props like traffic lights and buildings and fictional characters can be supplied as well in any style and shape according to our customers needs.

Best battery-operated Go Karts for amusement venues

Equipped with a powerful 780W brushed motor, Eurogames battery operated Go Karts are specially designed for amusement venues like Family Fun Centers and Amusement Parks. Featuring accelerator and brake pedals, our one-seater or two-seater Go Karts are supplied with electronic brakes and can do up to 20 km/h (12mph) with 1 or 2 speeds. Their motor-wheel-engine offers superior durability and minimal maintenance together with enhanced safety; with their remarkable battery life they can be powered up for up to 6 hours. Our Go Karts can run outdoor or indoor on a concrete or asphalt track and any other smooth surface.

Eurogames Go Karts are manufactured according to the highest safety and quality standards. They are the perfect attraction for children over 6 years of age and they deliver a lot of fun in a non-extreme racing environment.

BIG CAR
Bigger cars for a greater fun!

With their average length of 2 meters (6 ½ feet), Eurogames battery operated Big Cars are among the biggest in the industry. They are specially designed for amusement venues like Family Fun Centers and Amusement parks and they can run outdoor or indoor on any paved or unpaved surface.

Featuring accelerator and brake pedals, reverse gear, head and tail lights, brake and turning lights, our two-seater Big Cars are supplied with four shocks absorbers, electronic brakes and can do up to 18 km/h (11 mph). Their powerful 750W brushed motor with differential gear and two wheel drive offers superior durability and best performance; with their remarkable 24V/120Ah battery they can be powered up for up to 6 hours. They are available in 3 models to suit different environments and settings; their body can be custom designed and custom painted to any specifications.

Eurogames Big Cars are manufactured according to the highest safety and quality standards. They are the perfect attraction for children over 8 years of age and they are a great alternative to other standard-sized battery-operated rides for rougher terrains or customized environments.

BABY RIDES

Fun filled battery rides for young children
3 years old and up

Equipped with a power-efficient 150W brushed motor, Eurogames battery operated Baby Rides are perfect for children 3 to 8 years old. They run at a very low speed to allow young riders to have fun safely. A great attraction for shopping centers and all venues where space is a factor, like amusement park games, our Baby Rides are very child-friendly and easy to operate.

Eurogames Baby Rides are the safer choice for young children. They are equipped with special sensors on the front to avoid collisions with the rail or with other riders. They feature a 12V/45Ah battery and, thanks to their remarkable power efficiency, they can run for a whole day.

Our Baby Rides can operate outdoor or indoor on tiles, wood, concrete, asphalt and any other smooth surface. Their installation requires minimal areas.

Eurogames Baby Rides are 100% made in Italy according to the highest safety and quality standards. They are available in 13 models for 4 environment characterizations – Safari, Jurassic, Farm and Car. Their finish is hand painted and each character has its own unique pattern. Their extreme portability and space-saving efficiency make Eurogames Baby Rides a great attraction for any setting of kids vehicles games.

BUMPER CAR
Give a spin of fun to your family entertainment center

As the first manufacturer in Europe, Eurogames is the leading innovator and most reliable source for the best Bumper Cars in the amusement world. They are available in 3 models - Space, Hyper and Ice - and 5 basic colors. Their body can be custom designed and custom painted to any specifications and accessorized upon request.

Our one-seat Mini Bumper Car is a great attraction for children between 3 and 6 years of age, while the bigger and more powerful model is suitable for everybody. As our regular-sized Bumper Car is equipped with two seats to accommodate two players together, younger players can also ride if accompanied by an adult.

Powered by rechargeable sealed batteries and twin no-belt electric motors, all our bumper cars feature a token mechanism and a digital timer which regulates the ride functions. They are operated by easy-to-use joysticks and can run indoor or outdoor on just any smooth surface like concrete, asphalt, wood and even ice!

Our Hyper Bumper Car features an infrared shooting system and a digital display on the dashboard. Its original "shoot & spin" function makes it spin when hit and the digital scoreboard keeps track of the number of targets hit to reward players and ignite the fight.

BATTERY
2 x 80Ah or 2 x 120Ah AGM
Working time: 4-6 hours
Rechargeable in 6-8 hours
Remarks: batteries and battery charges are sold as accessory (not included)

Eurogames battery operated bumper boats are certified for use in commercial operations such as water parks, amusement parks, fun centers or open water locations. With their two seats and zero-emission engine, they are the perfect family attraction both for outdoor or indoor facilities. Powered by rechargeable AGM sealed batteries that can power the boat for up to 6 hours, all our Bumper Boats have an exceptionally solid built and can hold up to 440 lbs/200 Kg. They feature a token mechanism and a digital timer which regulates the ride functions – like speed, play time, sound effects and music. Eurogames bumper boats are available in one basic model and 9 character models - Willy, Crazy Polyp, Dolphins, Funny Duck, Swan, Happy Bear, Frog, Hippocampi and Pirate - which can all be custom painted and custom designed according to the customer needs. Upon request, some of the available models can be outfitted with a water cannon. We also offer a fun line of Mini Bumper Boat in 5 attractive characterizations: Crocodile, Panda, Monkey, Ladybug and Tiger.
